TOBACCO CROP POOR.

Ward Headley Gives Out an Interview on the Situation.

Louisville, Ky., Aug. 4.—That the tobacco crop of this year will not be more than half of an average crop in quantity or quality, even though the most favorable conditions prevail, is the opinion of Ward Headley, who is connected with the Burley Tobacco Society. Mr. Headley will not say the present conditions are very uncertain and the quality of the growing crop is inferior. Heavy rains in Kentucky have damaged the crop. On August 16, President Clarence Labov, according to Mr. Headley, will not say on 120,000,000 pounds of tobacco in the burley pool and will offer it for sale. The price fixed by President Labov will hold only for one day; the executive board deciding what price shall obtain after that day.

Notice to Water Consumers.

It has come to my notice that a number of people are using water from the city mains whose names are not on the books and who are not paying for same.

Some people have been cut off for non-payment and other causes, and have cut themselves back on without notifying the office. Others have cut themselves on in good faith, intending to notify the office and have not done so.

Parties cutting themselves on the water service are violating the law, whether they intend to notify the office and pay for same or not.

Hereafter all service connections must be made by the City Plumber, and application for the same must be made at the office, otherwise connections will follow.

The water plant is losing lots of money because parties are using water and not paying for it and I ask all citizens who wish to see the city water plant prosper and get out of debt to assist me.

Respectfully,
M. M. ARNOLD,
Alderman No. 1.
